

Bilerro, with over 25 years of experience integrating onboard systems and merging Operational Technology (OT) with Information Technology (IT) systems.

At Bilerro we provide specific solutions depending on the typology and needs of our customers, providing them with solutions of high technological value through integral projects and services.

We handle the definition of requirements, design, development, implementation and commissioning of various systems. Concurrently, we manage the warranties of these implemented systems and carry out their maintenance to offer a full-cycle service.
